We are a **language and culture centre "PASSWORD"** from Latvia, legal status: NGO. We are a local organisation that currently employs four people full time and three part time.

We are an organisation that was established in 2007 and aims at lessening any forms of xenophobia in the local society as a tool using language and different foreign dance teaching.

One of our main target groups is youngsters, also disadvantaged, whom we try to integrate in the local society by using different methods of active participation, e.g. trying to organise their free time by organising different events, leading their activities into international level so to gain a broader perspective as well as raising their self confidence and developing different personal skills.
